time-box it. "2 minutes" defangs the dread.

cohort · guide

cohort 7 · week 3

welcome back, Marcus.

This is your private learning guide. Three short steps to set it up — **about 2 minutes**.

1 tell us where you are

2 how the guide thinks

3 try a real question

Begin →

B2 · self-assess

cohort · guide

step 1 of 3

How are you feeling about week 3?

No wrong answer. This shapes how I respond — nothing is shared.

- I'm flying — bring on the hard stuff
- I'm keeping up, mostly
- I'm a few steps behind and worried
- I'm completely lost

Your answer is private. Admins see anonymized cohort trends only.

honesty option third — most-clicked spot on a list of four.

show, don't tell. side-by-side ✗/✓ is the clearest contract.

w-it-works

cohort · guide

step 2 of 3

How the guide thinks.

One rule, two examples. Read both — it's the most important thing on this page.

WON'T DO THIS

"You're missing a return statement on line 4. Add `return total`."

WILL DO THIS

"What does your function return when the loop finishes? Try saying it out loud."

this might feel slower at first. that's by design — and it's why it works.

B4 · try one

give him a real question to start with. blank input = blank mind.

learn.cohort.app/welco

cohort · guide

step 3 of 3

Try a real one.

Pick a question you actually have. The guide will respond now — practice round.

from your week 3 work
"why is my recursive sum function returning NaN?"

conceptual
"i don't really get what a closure is"

your own
type a question...

Tip: messier is better. The guide is good at finding the real question underneath.
